“Even in the tough conditions the boat felt very safe heading directly into the waves, beam on and in a following sea...”

“even though this is a big boat with a beam of 2.4m and overall length just over 7.6m, it can still be loaded on a single-axle trailer and towed by a vehicle with around a two-tonne towing capacity...” (actually 1.6Tonne Ed)

“This allows fishos to pick a boat size that suits their budget and space constraints but still ensures they get a proven hull design and big boat for the length due to the wide beam...”

“there is so much fishing room at the back of this boat...”

“ a boat that carries heaps of people and gear with loads of fishing room...”
